4. Your comments							
 ^{4.1)} What are the best things about the module? Fascinating Learn a lot about aircrafts. Good use of examples. Intusting Entresting Entresting Well fought, Malersta 	hreshing and		ا د ومنو	00 W	ell a	o relateati	
No powerpoint presentations, up with the lecturer. No use of powerpoint p are also combined.							C
It is challenging.							

School of Engineering and Materials Science, Aerothermodynamics of Fluid Flows, DEN5242

It is challenging.

concepts from nonpoessible to compressible flow a perfect.

the teacher is leaching not reading notes

It is very interesting and the lecturer allows gives us an in depth understanding

The paylion shown by the Instructor is most encouraging.

THE MODULE IS NERY INTERESTING AND IN DEPTH, HOWEVER IT IS ALSO EXTREMELY CHALLENGING

The organisation and enthusiasm of the lecturer.

The lectures is very enthusiastic and teach very well. Very satisfied with his explanations.

The lecturer is really bood, almost perfect

·LECTURE TOPIS

The content is very interesting and the failing is very very very her thought out.

EXAMPLES used TO CLEPR THERETICAL CONCEPTS

Actually interesting

~ Interesting

The content was well taaght as the early topics were hard to ond exstand. The content of the module and how the pecturer uses his enthusiasm to reach the module. The lecturer is very endusiastic, this enables us to the tollow the class more easily taking into account the complexity of some content. Interesting Interesting ^{4.2)} In what ways could the module be improved? - More visual representations to be (p explain lecture either via animation or more videos. Maybe cover the material the a bit slowly. sometimes the lecturer goes too tast, be abit much thorough QPM PIUS needs to be used more on the viedos are not clear if avialable in the first place. Implus resources, working, and annex for tutorials online Providing more organised printed notes for study outside of the lecture Answers for the tutorials provided prior to test/ Eacon - 4 lectures were recorded better, and beet works were written on the projector molead of the blackbourder. so it acts recorded on to Omphilis. Fix the QREVIEW ffs

one lab session as against two.

THE QM REVIEW DOES NOT WORK AT ALLIN MOST CASES, ADDRERS ANSWERS FOR PSC'S ARENT AVAILABLE.

More examples in chass

a-Review is not verticing well!

Q-Review Review need lots of improvements.

· BY PROVIDING MORE BARMPLE QUESTIONS · GLODD REGINGING OF Q-REVIEW QUESTING · TELL DOCIDE THE TRAILE WILL BE GIVEN ON THE UPGOMING WEEK

Beffer feedback on the completed consensition would be good.

GIVING HORE EXERCISE WITH RELATIVE SOUTIONS

Make content more understandable. Do not assume we understand everything on the first go.

- His aperter, its really amajing me, The only model i we groken the, doesn't even work - why so can't in the morning, make it 1 pm on suthin

- mode locuming resources. If you miss a withe it would be very huidtocatching. a veriew is very bad as most holes are write on monimilionariand and the minoral does by even it.

PSC, Answers to PSC could be given out earlier earlier in the module.

PSC answers and workingout so. That some steps can be uster under

Maybe a bit more stanly when explaining because we need time to about a information.

School of Engineering and Materials Science, Aerothermodynamics of Fluid Flows, DEN5242 (to a bit slaver ^{4.3)} Is there anything else you would like to tell us about the module? - I would have liked the work to be projected on Q-review. NO nla It is intuesting. It is really well taught Motellebi 15° good lectures! I will remember him. Poelly europyny the lectures. IT WOULD BE USEFUL IF SOLOWOAKING SILVITISHIN OF THE PSCS were provided on QMPLUS BEFOREHAND. nah uno

- 2 The only negatile is more resources should be used haveny apart from that the module is terright well. More Hopesson Morallebu is an Excellent requirer.

ND.

	SLIDES HAVE ENOUGH INFO					
	Wiley +					

There aren & a lot of words, state good.

Intersting topics

Exploding Guitar Grample

No report_s

The Solutions are easy to follow when written on the projector.

Very good sectures.

The examples in class

HENRI

Good

there are a lot of examples to help explain

The slides are put online before the lectores. Example questions are very helpful to our learning.

The soluntion

Challenging.

The rectives are we well taught, and the rectivers always arriver our questions.

All of it

More practical examples

Examples! Really good PSC teacher!

Questions are challenging

maths

Writing Notes whilst it records.

- the module was well ba ught from slart to finish with each topic heing explained throughly.

Very interesting lensory methods side

Learning about new concepts in a practical way

very well orginsed module.

Having frequent Hw and relevant PSCs that helped me the information sink in to solving examples in lectures and really good as it made it easier to understand the consent The solutions are easy to follow, ever there to price were difficult

I like the interesting and content and how the relate to real life. Both of the lecturers were great!

Dr. Henri's lectures-

DYANAMICS MOTION.

^{4.2)} In what ways could the module be improved?

1800 fo slowar.

Could use more examples.

Sometimes simplify it so we can fully understand.

The first half of the teaching could have been taught at a slower pace Have a better book to run alongside module.

More examples rather than derivations

I DON'T LIKE BHAA'S SLIDES. VERY INACTIVE + BORING. I DON'T KNOW WHAT HE'S TALKING ABOUT.

from the slidles Make the content easier!

GREED SLOWED DOWN WHEN USING MOTOGMANUAL PROJECTOR

use real life examples

Kno Use real life agineoning examples.

need more relatable examples to understand the openication of topics.

less homework

show how fit can be applied in reat at work

more relationse to and connections to real woold cramples Ber Because I have no idea how to apply most of vibration remarks to real life uses. Explanation of F. PARTIAL DIFFERENUAL ERUSTIONS, Site more steps.

More time on each & section.

Solution of THE PSC'S SHOULD BE UPLOADED ATTER ' WEEK 12, SO WE CAN CHELK THE ANSWERS,

DO POT EXAM Q.'S

Not Red

Abook/ PDF document of worked solutions so we can understand how to answer questions better.

Zeeve ways

Questions discussed in PSC + should be different from dass examples. i.e., more difficult ques.

Have more problem-solving classes, and parhaps publish the solutions to the PSCJ.

More practical examples

a lot of lectures were cancelled in the just few weeks.

Do more examples.

Do past exam as during learne

Too hard.

- more examples and solutions to all PSC's.

More examples and solutions to all PES's immediately For the first lectures: along the most.

> More emphasis of what needs to be known for Me exam

overall, very satisfied with the lectures material.

Provide more material to understand the basic concepts. Teach Mathab party in the module. Make it easter

The notation need to be revised.

Didn't like or enjoy wiley plus. Would be befor if the coursework Was given a different way

Change Adrian Briggs.

MORE SHURTER NOTES

^{4.3)} Is there anything else you would like to tell us about the module?

My favourite Module

Some extra help may be useful for those who don't get very high marks in DEN4108 as can sometimes feel a bit lost in DENSIOB because of it.

NO MATLAS

ALL LECTURERS SHOULD TEACH LIKE HENRI.

Two of the best SERUS lectorers ...

3 really don't get my real world releance of while in lectures writing down all these equations. Please don't use Mathab for CW answers.

1 LOVE IT.

Fur

No.

Nore

More practical examples

Lots of conversion but this should help ith revision for examp.

No-

More dynamics modules!

Do some magic to make $\dot{\boldsymbol{U}}$ heat and wave egg easy

Ifound Do Riggs difficult to liston to.

content should be reduced.

content should be reduced,

Overall him module.

Tt & hard

More in class tramptes would be appreciatied. Wave Bithert of compleadedy make it easy. (2)

4. Your comments

^{4.1)} What are the best things about the module?

the content Learning,

· lots of examples • all as answered

Noting

pace of the teaching

Content.

Pr Hicham uses very interesting examples during lectures. \$ Combustion. Cary Ì

Plenty of examples

Lecturors go through examples in detail in the lecture

Examples are provided with each new topic taught so students can understand better and know how to do that topic.

Slides Rythm

Space

very informative d'entitivisiastic. & gouduse of examples Good lectures spscs

The sides have a lot of information / Yi Jui is very enthusiastic

LECTURE EXAMPLES

Tutors

REAL LIFRE RELATABLE SUBJECTS/ERAMPLES

Yi Sui!

Well prepared

The lectures are very enthusiastic about the module and I inderstrand everything well

The smatheness of madeles the module and herving lass of psc questions

were + aught ; do examples in recture ; aware of exams type greptions

Enmusiasin of lecturers, mainly or Yi-Sui.

Represhing attivde.

Yi sui!

The techners make good use of example so use get Practise in their presence

D.R. Vi sui's poor is interesting

All the slides are always on QM+ before the lecture, the lecturer care about the students, they always answer our questions and they are approachable. Doing examples Well planned, right pace, understandable content. learning about energy. ewy, les ^{4.2)} In what ways could the module be improved? Change timetables so it can be spread out, give us more notice with conce C/w - Not change rooms - 3 hours in a row! More examples Who decided to put 3 hours next to each other? Budidea. Dr Hicham should teach the whole module. Break up lectures instead of having so many consecutively (3 hours one after another) DON'T RUSH. PLEASE (3) Easier notes QUITE BOORFING, PLS MAKE I I ENTEREDIING BY WITHING

POPLYTPIN DIFFERENT/NEW TEACHEN STYLET.

Don't know

More info on QMPlus + provide lecture notes.

If there a Share letter do I thr, summbreak In-Distribute letters better as Bursma rows on a Friday isjust TORTURE!

Dr Adjali could be more motivated

PSC lecturer, it would be petter if ysc were solve on the poold than eating ussolving them.

It is good

MORE EXPLAINATIONS ABOUT EQUATONS

Lecture how to be Ewice a week not just On Eriday

The working solutions of ASC should be uploaded on Qinplus so that it would be easy to check our answers.

Howing more intersting lectures and pricedical application

Stop the long time 3 Hs of one go lecture.

DR. Hicham should have solutions to the questions in his notes, MMATALLX (solutions should be in the... More PSC's examples, the PHD students go through more examples

Give more examples and upland more greating on grippies to practice. Upland video to make understand the course - MORE PMCHSE QUESHOULS 14/1 Discussion of more difficult examples in PSC. Arrange the timetable so that we don't have a 3 hr lecture - too long! me I have a a more ^{4.3)} Is there anything else you would like to tell us about the module? C/w could be more less vague we didn't know how how long it was meant to be. only 1 of the psc classes ran for 2 weeks! means the class was too crowded + it was hand IT'S GREAT OVERALL WELLS Reamange timetable so no 3 hour lecture TOO MULT TO LEARN IN ONE DAY, TRY TO SPETT THE LECTURER TO DEFFERENT DAYS. No No, everything's good. USE The FORUM Style OF 12St year.

More recap of year I thermo would be nice

No.

ND

I hape we continue to been nore in the second semestar about enorone conversion and win

Moving from Englog to Bancrift building

put solutions in the notes or a separately

I really like this module, the lecturer make it more enjoyable.

Nope.

4. Your comments					
^{4.1)} What are the best	things about the module?				
Novak's	enthusiaon				

PSC questions are useful

Coursework was good. (PBL)

The PSC is good

None _____

Use of blipper questions at beginning set of lectures (Pavel Noverk).

Do Novak was very enthusiastic and kept the nodule relevant and interesting

The lecture slided from Or Novak are useful.

The PBL was fun, also the keyary work engaging and amazing.

ELECTRICITY

PBL - Very interesting and useful to get hands on experience

It is useful to understand how these practical devices work. Using breadboards in lectures was helpful (PAVEL did this).

Nothing

Simple sthematic simplified version of the equation relevant for exercises

Dr. Noviak has ready clear under annound so single best we are possible to experience what we are fought which of releasing high difficulty in a single best with to experience what we are fought which Best thing is the PBL and getting the opposituality to experience what we are fought which frought me in the angre of scales more than I learned in the whole module

example

are

used

Labs session improve understanding.

Potenter Reievant

lectures well distributed across timetable. Good lectures. Detailed notes on Quipus. PBL was thoroughly enjoyable!

The content is interesting

Learning about electronics.

The first lecturer made the lectures intersting and made a good use of Omplus.

The examples of circuits in real life

Kent - would

It is interesting - some topics are repeated, which helped is understand better well prepaired and understandable notes

The fact the theory can be the directly applied to a practical circuit

Interesting .

The lectures are relatively clear and well trught

Lectures were well organised and relevant examples were used.

^{4.2)} In what ways could the module be improved?

Carpi stans dann + explains topics

· Pavel Novali's lectures go too quickly · Federico Campi's lectures are sometimes slow.

Capi needs to be more fun. - Use the mic in great hall PBL is rubbish. We haven't learnt onything like circuit boards.

Change it immediately

Less use of Federico Carpi a nis lecture slides' comate him use flemicrophone

Less repetition of topic,

More smaller pieces of coursework to allow understanding along the way,

Du carpi looses his audience with a few minutes. His lectures are slow paced and not enthusiastic anyton on moch interesting. that could change

I don't lean onything during lectures. (I don't think either lecturers are effective). If there was additional resource available, it would be a easire to study/catchup

Consistency in lecturers, as interchanging was somewhat

MORE EXAMPLE WHICH SIMILAR TO COURSEWORK

make the PBL early for all students. Boring & 2nd Inture 5 Y New more massing prompting ply Improve the way of teaching Me More vexample question to go through in lectures? (of the harder)

No way

Theoretical part can be explained more deep deeply

Bring buck the wipper game we had in the beginning of the Gemoster

the module - Having more cass row the - solving more champles in rectares as we found that the the question and CW are ways met not similar to be what we are tranght in lectures, esp. Dr. Norak's Instead of the theory bit maybe we can solve more exampled

Since Dr. Carpi is feaching handling revision, it could be seperated from Dr. Par Novak. Did not have to min concurrently. I.E. Dr. Pavel - week 1 - week 9. Pr. Carpi - week 10 - week 12.

Hove problem solving Auring the lectures, especially for the second port (Dr. Capri's)

More emphasis on what information needs to be known for the exam

-More use of Microphones Please (Carpi)

More examples

I belive the module would be much better if the first lecturer was the only wetwer because having the celturer covering the same material that very conflising.

The second learner spends too much time explaining trutigs.

If more examples with solutions were given

- add the lecture slide as a powerpoint - going over powerpoints & pody is is conjusing - add is are harder to extract key info. 1 pm too.

Sower

The communications for this module have been abysmall. On multiple greations I emailed either a leader, the module organizar, or the department to ask evertions that, as an associate student. I needed an answer for and never recieved a reponse, which I...

^{4.3)} Is there anything else you would like to tell us about the module?

Please Ston down.

Maybe more examples similar to converse during the lecture. Coursework needs to be changed. PBL is too highly perandege is not useful at all. Federico doesn't use the microphane as it All federico does is read his pafs - why do I need to come in if I can just read it at home No-PBL coursework proves easier it a team member has electronic background-can put others at significant diseduantage Friday 5-6pm lecture doesn't work well for concentration. Do less theory it lecture and do more calculations and noted examples. No. No The lecture on friday when really bad timing Sometimes Pr. Novak goes too fast with the slides so it might he havd to keep no Overall an interesting module. Quite Difficult.

5 Maybe lectures could co-ordinate and go over 1 topic at a time. -both ketures heading different topics is conjusing

... found to be quite rule.

^{4.1)} What are the best things about the module?				ſ
only 1 lecture per u	reen.			

Adam Satcliff

The module is general less & to example and correct answers its represhing to have a more relaxed modula The lecturer is enthusicistic

Real life examples, challenging assignment

INTERESTING PROJECT ENEN A FRONT ALE ENERY

quest speakers

The "Toy PROJECT" (OURS WORR

Nothing is good about this module on the module orginser.

The Group project as it was challenging as well as very important for stadent development.

The project

Industry people giving lectures that was very helpful

It had different quest lectures. It was really informative to see their ideas. Very practical and helpful for projects.

THE COURSEWORN ARE VARTED AND INTERESTING, AND THEY PROVIDE INVALUABLE PRACTICAL EXPERTENCE.

It's very realistic and involve real life projects.

Adams weird t-shirts

Well Taught and Prepared in advance. Made Introshing through examples.

It's only 2 hours of the week.

TEACHES ABOUT DESIGN AND MAKING MONEY

The quests that come and give us lectures. They bring up interesting land realistic topics.

we had lectures from different people who had advice/experience to share with us.

Nothing

The hands on work.

- Great information about "the real inbuild", how to ma businesses etc.

It's more having a project as careauark and the lectures are interesting.

hear from different people in the industry

The module is so reliverant to the business where and teachers lots of skills. . It's so intersting

The information is interesting.

^{4.2)} In what ways could the module be improved?

Less reading from powerpoints.

The madule could have more interesting topics

Guidance for exam. What is involved?

Lecture stides to be upladed either betwe lecture or after lecture on the same day. More descriptive four entrances

More calculus; engineering based, resept

The toy project ded lines and condent organisation can be improved. Eg far G1:23 Was not available.

No Comments.

group S

More practical examples

Better lecture slat.

Giving MORE EXAMPLES ABOUT TOPIC DISUSSED.

Distribute lectures over week

Decrease the amount of Theory involved in Vetures. Include more practical, like quizes.

The bectorer should understand that reading the Slides is never interisting and repeatings over and over is very boring outs having too many gusts bectures made it have to understand how the prain will be sit.

Separate actury on different days, one hour each as against one "two hour lecture".

Add mose about Business studies rather than just basic striff

It could ner smoother

MAKE CLEAR WHAT WILL BE ASSESSED DURING THE EXAMS SUGGEST RENEVANT SOURCES (BOOKS, WEBJITES,...) THAT CAN BE WED THE FOR PERFONAL STUDY AND THE TO FURTHUR UNDERSTANDING OF TOPICS COVERED.

Reply to emails before a week

The content around lectures is focused around # business ... its quite boring. And peer assessment for the project is anfair because even if you put in all the work other members will rive you a bad % because rad The content of the module could be improved. The content itself is mostly religing on memorizing criteria and that by itself is demotivating.

More thelp with regards to the project.

LESS IRREVELANT CONTENTS. REMOVE 10% MARKS OF ATTENDANCE

More guidence for the group project. - How to do the report + it we are doing the correct thing More quests, opportonell reading, atticles, research

It could be clearer what we need to know for the exam

Open the labs for causework

The lectures and it always relevant for the project. I have difficulty seeing the overall purpose of the jectures as a cohesive unit. The guest lecturers were cometimes bad, and I pett like a lat of lectures I could just learn from reading the slides, and the lecturer had no purpose.

more organized

the external lecturers were not always great. Some of them and not have gave presentation string is although the material they were teaching were really great, I couldn't make the must of it because of the uninteresting way it's presented.

There isoder top things we depinately need to know is it specified. Writing notes is difficult. There

^{4.3)} Is there anything else you would like to tell us about the module?

the group project is very stress ful. Nb Show us examples of questions we might be asked & marking criteria for Tay. More shucture in he way module taught Group project is hogue shared give privilege for members.

The group project weight too much. The groups number pelection, which is based on last year's result is not ROOD way to organised The coursework should contribute 60% of module

I really boleive that the lecture should teach intersting things instead of what he is giving at the moment.

It takes a lot of TIME.

Nope.

Being siven groups with utterly useless people isn '+ cool

nope.

Not really

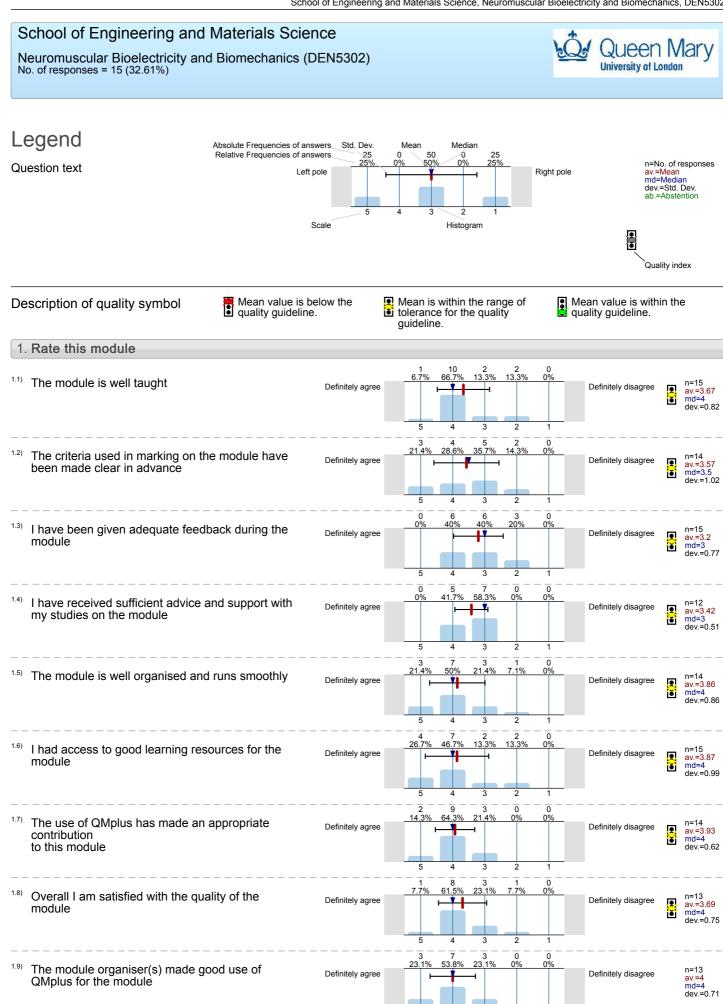

No hely-for coursewerks

No.

Adam speaks about himself too much

The project is too open ended. We are teaching anselves how to do it all. It hadd be better with slightly more guidelines.

this module is really great in concept and ran be improved so much by providing better speakers, heaving maybe some field visits to relevant places. The speakers were explicits in this fields but their presentation skills mode it have to pellow them

, and the second s	
Inkrestry topics	
Learning about new concepts	
ð	

Good examples were provided. Lectures mere well organised. Detailed lecture notes (extra reading molterind) summarised detailed. ^{4.2)} In what ways could the module be improved?

more examples and information on lecture seides

More feedback through tesos or short guizzes.

We could have more them approve the what sort of questions we used. The lectures could improve their respective teaching styles. Dr carps could be less repetitive and slow and Dr filesandres could go slower.

Dr. Cappi is sometimes too slow in his lectures, explaining things all over and over leven though they are relatively simple) and than strips through some more difficult that is noticen too tast. The Rinn-Jellers had a lot of contention her lectures, More examples of questions that we could be asked in the exam

More explanation and help for the PBL and using Matlab gaince it i the first time for most students.

For the Ultures to taught quicker

Nore emphasis on what needs to be know for the final exam. Nore information for the coursework.

MORE VIDEOS ON TOPICS WOULD BE USEFUL.

More videos and more examples

Russell and Pankay were very enonuclastic about what they were teaching Russell's lectures cure well taught! RUSSELL BINIONS SECTION WAS WELL TAUGHT AND EXPLAINED HOWEVER GLEB READ OFF SLIDES AND The simplicity.

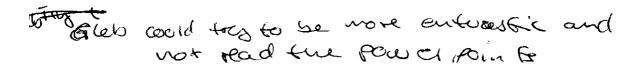

Everytting

The subject is interesting and the module gives a good overview about basic theory and practical methods and applications of the theory.

^{4.2)} In what ways could the module be improved?

The 3 points of the module don't seem to relate to each other at all The his materials seems tacked on + not relevant Lecturer needs to answer questions and give some curk to improve moke sure that we understand the context.

Gleb was not ientrusiastic about teaching course, it he was more interesting, I would be more mothered to lister interesting

the Blides and is not very enthusiastic Gleb only reads off making his bit monotonous Gleb could be a bit mare enthusiastic and engaging GLEB COULD TRY TO NOT READ WORD FOR WORD FROM SUDES!!! More Enthusiasm (fles) Posting clear versions of the slides on Power Point. everything is fine I always appreciate a summary of what I will be taught in the module. Since it is a broad module, with 3 different lecturers, this kind of summary would be helpful. on online split materials scientists from dental & medical materials for there parts ^{4.3)} Is there anything else you would like to tell us about the module? more nesell, he is an engaging, interactive and good leader for then module. N/A. No I didn't hardoy the Biology lectures from the third lecturer. Nothin 9
