The possibility to require new know/edges the lecturer is well prepared and presents the topiz in a clear nam. It's interesting as its very relevant to the overall course It is what I enjoy along and it is acrospace related. He prepares his lectures and answers questions. He teaches in a way that it is engaging and understandable. The lecturer is very clear during explanations. Motallebi explain everything well and smoothly, makes evenithing well understandaste. The lectorer is a my good tacker. ^{4.2)} In what ways could the module be improved? BE GIVEN A BOOK OR LECTURENOTES COVERING ALL THE MATERIAL None go at a slower pace, too quick Perhaps go slightly slower in lectures More explaining athan services writing on the board

use of QMPIUS

NORE detailed lectures More practical laboratories or totorials. The lecturer should make more use of the document connera so the lectures can be seen on Dreview. Perhaps have not loss per make as it is lot of content in shert leathers.

^{4.3)} Is there anything else you would like to tell us about the module?

VERY UNORGANISED.

Nore

Dr. Motallebi is the best lecturer, don't let him go.

1) is quite in treating.

^{4.1)} What are the best things about the module?				
ITS INTERESTING.				

- - -

The subject is very interesting.

Notes already uploaded to QMPLUS.

All powerpoint presentations are available online

A very intresting and challenging module. Mike Reese is very entherrisetic about the topic and grounds about of the secence in real world applications

well organised

- The test at the end was used we ful could have warned us before) - The actimical of an sometimes
- Cuestions answered during

Gives good examples of applications of ceramies.

Interesting. Related to third 11 project. Enthusionstic about the content. Majer learning enjoyable. Mike Reece and the Postdoc

^{4.2)} In what ways could the module be improved?

MOVIE QUALITY AND ANDIO WAS NOT AMAZING

(When we watched movies) videos)

when main lecturer was not around the videos used were not helpful and some lecturers were not all that.

The videos played for a lecture should be up to date and audiable with subtitles.

> More examples of questions for the module.

Lecturer should come prepared

Byayer nore enthusiastic

recorded possibly as material content is guilt heavy.

- Tutonials on every topic.

The violeos were of poor quality.

PhD Suderts should be Suffer

Maybe mere horines in molestending

Do not let that PhD student teach. Or at least don't more let him use videos.

Perhaps more focus in terms of exam preparation

^{4.3)} Is there anything else you would like to tell us about the module?

NO.

There should be more exam preparation sessions answering the exam questions

It is good

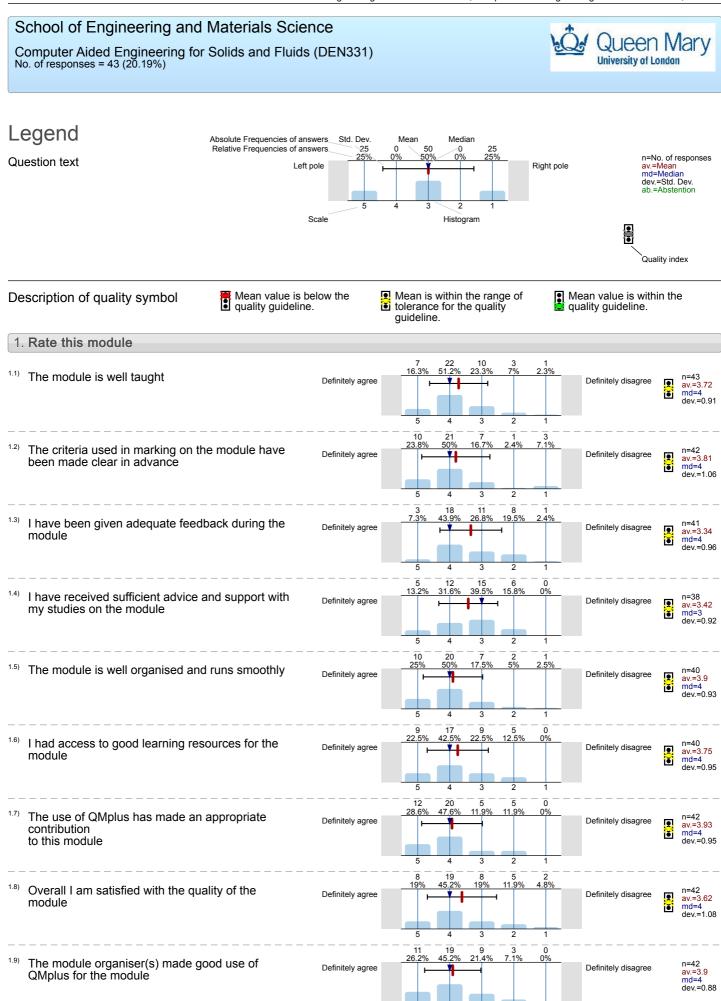

nice was an entrustantic localier - with I actually

No.

No.

Non Meay (pHD shudent) - i think! - very helpful in the Interial on cercanic structury

The videos # had bad audio, and the PhD student was on The lecturer is very inprepared for the rectures - although the Content is potentially interesting he doesn't teach it well.

 ^{3.2)} Are you a student participating in the Ciência sem Fronteiras - Reino Unido programme? Yes No 91.7%
4. Your comments
^{4.1)} What are the best things about the module?
Coursework - the conservork encourages students to find details about types of material & technology and present these findings to the rests of the group
Leaning about the environment with such a broad and realizing user.
Simplified details for complex systems e.g. LCA.
The presentations given by students are very good as it helps to summarise the large topic of the module.
All of the science and other concerts is very much based in the real world suburition
⁴²⁾ In what ways could the module be improved? More guidance an what the exam is going to be on and the topics that we need to know.
"LCA) Life Cycle Analysis is merbioned a lot but neither lecture has performed one Information given about it was vague.
· Student presentations relevance to final exam could be made clearer.
Actually using LCA and what it is used in terms of analysis.
The relevance 🗰 of lectures to the exam should be more clear. Maybe show more example questions.

4.	Your comments								
	What are the best things about the module?								
I	nteresting, involved								

It's an interesting process all engineering graduates should know about.

Gamples when seen many releven, as do do The Chrs I feel as though the subject with is directly applicable to real will sinchians got a chance to learn many types of materials that can be wed in Engineering.

The relevant and current examples and work assigned James is fun and really good Trafestor. The lecturer is very engaging -The best thing about this module is that the materials all have real use applications which are discussed in Legneres which makes it may interest Case study rules fun sterritset beog war, atsydua pritaretri ward very enthusiastic, funny and teaches well James is The lecturer Well taught with examples, Lecturer's pan examples. Lectures are very interesting. - Get to work in grazes on real case studies which also gives us as students opportunities to present our idea and findings. The lecturer MAR Access to download the CES softwarewas very useful. It is and to be able to apply skills to the real-life case studies. The lecturen is really good

James is very enthosatic

Glood interaction with students, Interesting case studies

The lecturer!

James Busfield is an excellent person and lecturer. I hope someday I can be like him, he is good in every aspect of life.

To be able to build on presentation Skills. James

James lectures are well preferred, entry to un understandable and interesting

great depth of knowledge and relevent Fechnical examples by entran werd the proper take function.

Very well sun and Junes is very possionate

Very entrusiastic lecturer & indees contents interesting & interactive lectures

EVER MTHINE

Sources is very enthusiastic

^{4.2)} In what ways could the module be improved?

Marks allocated to coursework should be high. Setting more realistic headlines by coepers sufferming with other module. information / guidance with course works and better feedback, at times we felt very in the dark to many inrelated emails the engrecient access to cits I don't the how

It repeats a lot of materials information, so some of the materials students: Probably would have preferred something different.

The lectures should not allow the time of day to affect the quality of the lectre. Many of the lectures on materials and processiz were bad. Go back to QReview, watch when motallines rectare and please doubt repeat.

les carfunne & Schedull.

It is good as it is now

For the case studies it would be preferable for a longer period of time for research + preparetion. More time given for case studies.

Make sure the PhD students who mark Counsework 1, Mark it correctly.

- Avoid duelling on the metable for such long penods of time - Go through exam questions in class - not pust multiple choice

Better finituble for lectures as it was unchear when the lecture was or where it would be held next.

The case studies can be more cheaver & organised like RR case study was all over the place & teck al NONE

Eu more example/model answers

^{4.3)} Is there anything else you would like to tell us about the module?

Tight deadlines

GET GTAMES AN OBE !

I am really endoy it and I endoy that sufficiely's

ND.

ND.

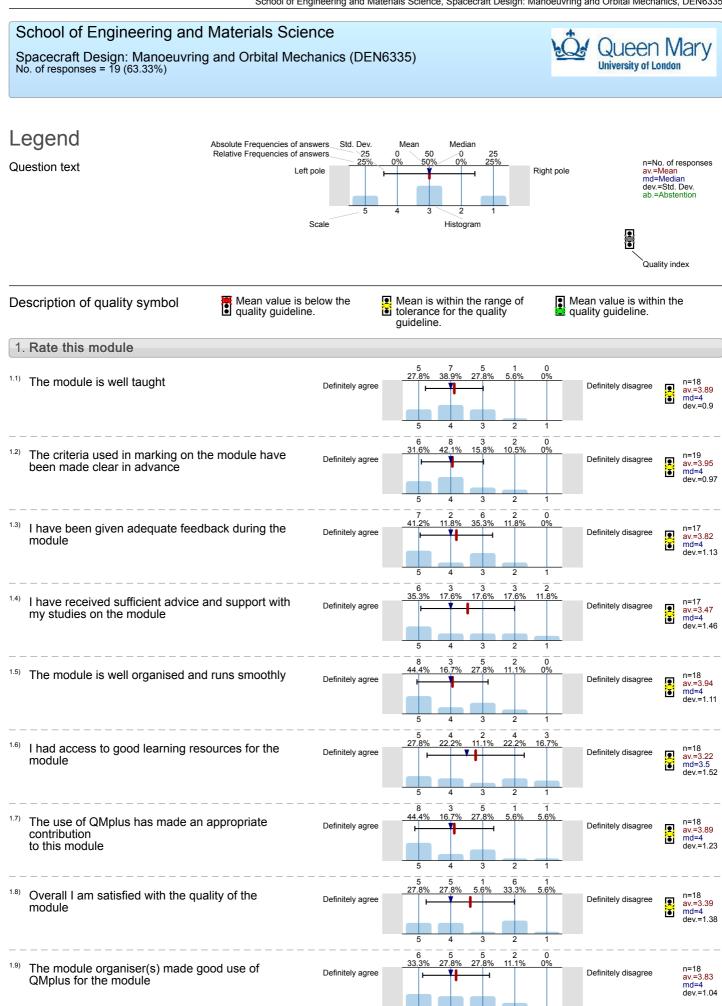

The lectures is generally enthusiatic about the module topic, it's well structured and interesting. But it would be nice to not have lectures where slides are completely skipped over.

No, was good The case studies more really interesting ...

Case study is very interesting. It sives students a chence to research and work with team. A chance to understand usage of diff: mat in real operations

Mueller Con learn from James,

would be entremely boring if anyone else taught it. ND: - It's really well tanglet get a chance to get feedback. Not really anything James is an amering lecturer! No. Great module one of the best tangent mue op code. greent overall & pushes the student to think for themselves & think existically NOTHING

4.1)	What are the best things about the module?				
יך	e module is challenging and alterest	Hruz.			
ī	HE CONTENT IS INTER	ESTING			

The Subject is really interesting and the entire modente is exciting lectures end PSCs.

ITS VERY INTERESTING - CHALLEAGING YOOR MENTAL FACULTIN

Graceat Engineering Enonledge.

The professor is passionate about the subject and it definitely shows and improves the course, the makes sure to the the concepts to real world examples which helps my understanding of the lessons.

The topic itself is interesting

the module most wool.

CONTENT / ENTHUSIASM OF LECTURER

The enthusicsum of the lecturest.

quite intresting

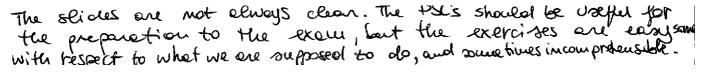

The catent is very reaching.

Enthusiastic Lecturer

⁴²⁾ In what ways could the module be improved? Lectures SliDes on QM plus must be improved in contino, in order to become more simple to understand.

BETTER LECTURE NOTES

SLIDES CONTAIN TOO MUCH, BUT DO NOT CONTAIN MATHEMATICAL METHODOLOGY.

BY INCLUDING MORE MODELS (3D).

better explain some points

Some points and not cleared.

I think that the seminars call be class-led instead of individually based. This would make sure that we all have the correct solutions going into the test. I. + was often hard to prepare for the ensure without examples more worked examples

Better PSCS. Not Enough examples in the Clearer Lecture Notes.

BE MORE DETAILED IN FOR BEFTER UNDERSTANDING.

The notes could be made more dearly so that they are easter to understand.

better Notes, DSC Solution

Improving The slides and pscs

More in depth lecture notes that are applicable to the problems given.

^{4.3)} Is there anything else you would like to tell us about the module?

WEEKLY ASSESSED HOMEWORKS WOULD BE A NICE ADD J TION, MAYBE 10% OF TOTAL COURSE. Yes. The book is useful but there are few solved examples. Huice, increasing the muber of examples in the lectures could be readed useful.

02.03.2016

EvaSys evaluation

More examples or provide better sources to practise." Heybe back of anorenen by students

The mathematics publical in this module has to be tought better.

Notes are busically useless, have to Stud for queues even after rithendu seu leptons No Teach T.A.; how to salve pscs!

4. Your comments					
^{4.1)} What are the best things about the module?					
The lectures / organisers + Cra	npield.			,	
It is a interesting model But the course is very 1	e Lectur engthy.	ers were Covers a lo	en-heusi t of ma	astect. terial.	

Interesting leature of leaturing lectures. 16 tot In-flight training course Cranfield course. If that Content Cranfield course obviously THE GAM - LIKE TUTORIALS Intrestly stroduction to stability incept of flight: Coarfield will. ^{4.2)} In what ways could the module be improved? M/A More fine to teteride Make the confert concèse. Rather then guantity, foces on guality. All we experienced is full of equations. Split into 2 modules. The day of in-flight course crashed with other lectures, change the date of the course if possible. Content difficult to explain. Hore examples solved during the lectures - Recolving lots of formules on the scioles it is very boring and pessive. Repeps, involving

the students with examples muld make the classes more active.

Content and me 2 graphical (digital) pichises y can improve teaching carace simultaneond

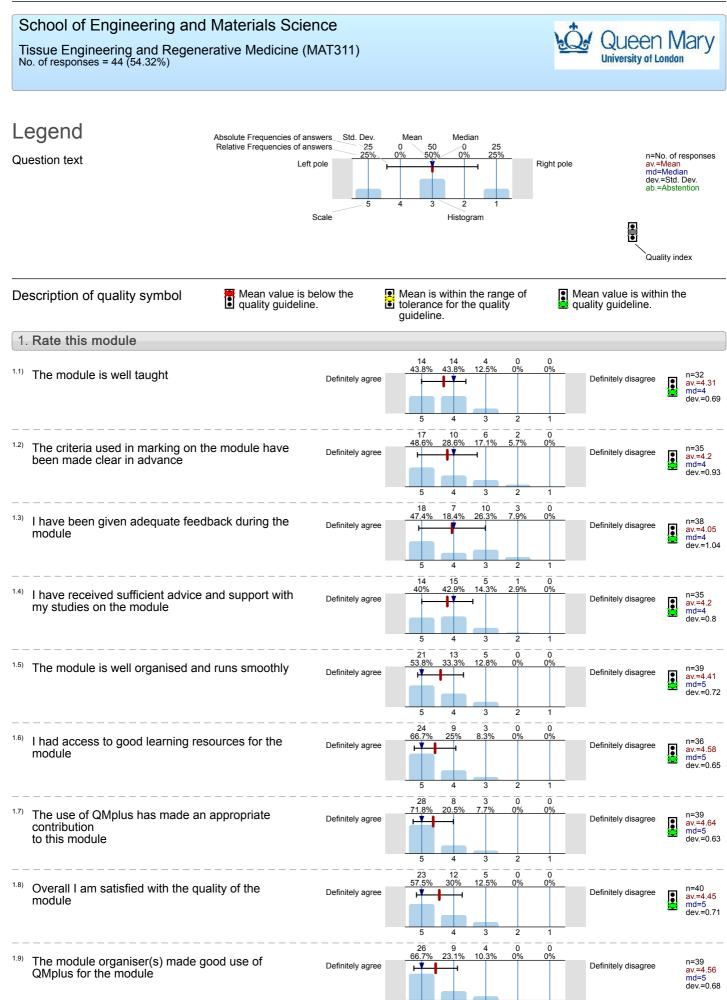

Definitions of symbols always shown with equations MORE EXAM- LKE TUTORIALS & LAB SESSIONS Core content is difficult to follow. A lot of nother and not erough plungi physical employation.

^{4.3)} Is there anything else you would like to tell us about the module?

please make the modele concese and focus on less material but elaborate it. It will help to undestand better.

No.

FOCUS ON EXAM-LIKE ONSTIONS RATHER THAN LONG, WINDER DISFICULT, UNANNOTATED, CONFUSING THEORETICAL DERNATIONS Mon.

Your comments ^{4.1)} What are the best things about the module?

hedres were very prod - lob g exating content Great teaching; below lecturers.

- Simple, easy to follow Leave - retaint long brocks.

Well tought, uses differents to improve the letteres (virtual lab).

Lectures

Sinch lecture + sealing structure lets + Virtu Late

lectre ac well preaced & exacting i Brilliant courses Well organised lectures, and well taught.

Of The very helign't with the consuch whited lab helved me to lear new styl eg. techno on twee Ely, CLEAR & RETENANT POWERPOINTS

50 interested In the content of the lecture Lam.

> The content of the module is interesting.

I really enjoyed Dr Tina's lectures. - she is fastinating + ver Inspir ing very vall structures and the lecting The A feaching are dear. **ה**

Very interesting. Virtual lab was fun. Jost lectures were interestiding and it was nice to have someone with in industry to talk to us.

V-good.

Interesting and relevant lab achivities.

Interesting content, mereaved exposure to literature

Very well taught

^{4.2)} In what ways could the module be improved?

Remove the virtual lab- Completely inseless twas a test of how well you can

- Ask questions - More suggested weaking

More wageted realing

Virtual Lab toutedious.

1 DID NOT ENJOY VIRTUAL LAB

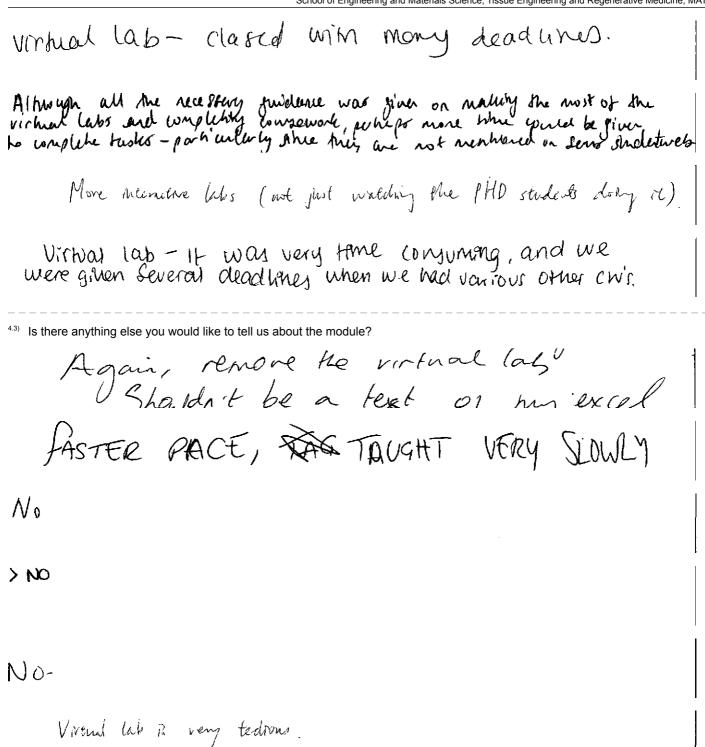

Here	More	fundamenta/	knowledge	Ìς	needed
------	------	-------------	-----------	----	--------

> Advice on + practice on exam questions.

REDUCE THE HUMBER OF WORK ASSIGNED ON VIRTUAL LAB AS IT IS TIME CONSUMING AND IRRELEVENT TO THE EXAM. EXPERIMENTS CARRIE OUT ON VIRTUAL LAB WAS ALSO DONE IN THE REAL LADS. WHICH WAS VIRTUAL LAB WAS TIME CONSUMING.

-Do not use a lot of time doing virtual lab

The virtual lab felt a bit spring on us out af no where and felt like a lot of work for such few maks. More explanation of how virtual (as bits into morket, and mattin the decelling on SEMS so we can plan for it conclude to and 02.03.2016 Evaluation
