

Programme Specification (PG)

Awarding body / institution:	Queen Mary University of London
Teaching institution:	Queen Mary University of London
Name of final award and programme title:	MSc in Dental Materials
Name of interim award(s):	PG Certificate (60 credits) / PG Diploma (120 credits) in Dental Materials
Duration of study / period of registration:	1 calendar year
Queen Mary programme code(s):	J5S9
QAA Benchmark Group:	
FHEQ Level of Award:	Level 7
Programme accredited by:	
Date Programme Specification approved:	14 Nov 2022
Responsible School / Institute:	Institute of Dentistry

Schools / Institutes which will also be involved in teaching part of the programme:

Collaborative institution(s) / organisation(s) involved in delivering the programme:

Programme outline

The MSc in Dental Materials is an advanced study programme designed to develop a significantly broad knowledge of the principles underlying the mechanical, physical and chemical properties of dental materials. Furthermore the structural properties of materials both at micro and macro levels are taught at postgraduate level. Special emphasis is placed on materials – structure property correlations in the context of both the clinical and non clinical aspects. The theoretical courses are reinforced by practical research experience. The MSc in Dental Materials provides students with the necessary tools and principles of Dental Materials that are currently used in Clinical Dentistry and covers the underlying principles of bioactivity and biocompatibility. The taught courses are complimented by a 60 credit research project based on both the student's and staff's research interests.

The programme is aimed at dental surgeons, dental technicians, dental hygienists/therapists and dental nurses who wish to broaden their knowledge on the clinical and non-clinical aspects of dental materials. The programme also aims towards materials scientists and engineers who want to work in the dental support industries, and the materials health sector in general.

Aims of the programme

This programme aspires to produce highly skilled, motivated, creative and team-work oriented graduates who want to specialise

in the Dental Material or related field. Also to clinicians who to improve their understanding of dental materials who aspire to a clinical academic career in Dental Materials.

The overall aims of the programme are:

- to provide a PGT level dental materials education of a standard recognised to be amongst the highest in UK institutions.
- to enable all our students to achieve their academic potential by providing a stimulating, friendly and supportive environment.
- to prepare our graduates with discipline-specific knowledge and transferable skills that will equip them for employment and continued professional development through self-learning.
- provide an understanding of the basic science underlying dental materials for undertaking research in this field.
- develop research skills and methods relevant to dental materials.
- provide a suitable entry qualification for PhD and DClInDent programmes in Materials, Dental Materials and related areas.

Specific aims include:

- analytical, creative, organisational, practical and communication skills.
- problem-recognition and solving abilities.
- competence in discipline-specific topics which contribute to the solution of problems applied to materials science.
- an appreciation of how theoretical and practical approaches can be synthesized to arrive at optimal solutions.
- an understanding of the relationship between their discipline and social, economic and environmental issues and constraints
- the detailed skills needed to undertake a research, development or design project in depth, understanding the technical, financial and time limitations.

The full time campus programme is also open to undergraduate dental students who wish to (and are eligible to) intercalate a Masters degree into their BDS studies.

For these students there are entry criteria that differ from non-intercalating applicants - in addition to the equivalent English proficiency, intercalating students need to have:

1. Successfully completed at least three years of the BDS or equivalent dental course (for clinically based masters this must include the equivalent of one year of patient based teaching (in hospital/dental practices/ clinics)).
2. Passed BDS year 3 or 4 exams immediately prior to entry at the first opportunity.
3. Demonstrate a clear and unequivocal interest in the field by written application and/or interview.
4. For students internal and external to QMUL it is confirmed that the beginning of the first term for the following year starts after all the QMUL Masters assessments are completed.

What will you be expected to achieve?

The programme provides opportunities for students to develop and demonstrate knowledge and understanding, skills and other attributes. The programme outcomes are referenced to the relevant QAA benchmark statement(s) (see above) and the Framework for Higher Education Qualifications in England, Wales and Northern Ireland (2008), and relate to the typical student. Additionally, the SEEC Credit Level Descriptors for Further and Higher Education 2010 and Queen Mary Statement of Graduate Attributes have been used as a guiding framework for curriculum design. Students who complete this programme will be trained to work in for example, the dental materials industry, in dental materials research and development. Students may also return to an academic environment and will be trained to provide up-to-date knowledge for teaching of dental materials to clinical dental students or dental technology students in dental schools. In addition students will have been given an ideal preparation for undertaking a PhD or DClInDent in a related discipline.

Academic Content:

A 1	Gain in-depth knowledge of natural and replacement materials found and used in the oral cavity.
A 2	Gain in-depth knowledge of the oral cavity in its healthy and diseased state.

Disciplinary Skills - able to:	
B 1	Undertake independent research on a topic relating to dental materials.
B 2	Design and evaluate the selection of materials to solve specific clinical problems.
B 3	Critically analyse and assess scientific papers, the basis of the methods of study and the significance of results.
B 4	Evaluate data and present it coherently in a variety of formats.

Attributes:	
C 1	Take an investigational approach to problem solving.
C 2	Undertake independent research using state of the art processing, characterisation and testing facilities.
C 3	Understand the application and use of dental materials in related clinical situations.
C 4	Report information in written and verbal form at a professional level.

How will you learn?

Through a wide range of different interactions including lectures, tutorials, laboratory classes and project supervision. Also independent personal study is anticipated as part of this degree. Students will attend weekly Dental Materials student meetings, hosted by the research active Dental Materials academic staff to discuss current new developments in Dental Materials. This will include discussions with both scientists and clinicians in a world leading (as ranked by QS score) centre for dental materials research in the Institute.

Students will also have access to all Queen Mary online lectures systems. All learning resources, including assessment submissions and feedback will be via the Queen Mary virtual learning environment, QMplus.

Students on this programme will share, modules with students on other programmes within the Institute to benefit from study within the overall context of the clinical dental environment of a University Dental School.

How will you be assessed?

Modules are assessed to test their relevant learning outcomes and assessment includes, but is not limited to, coursework and summative examinations. Full details of assessment will be outlined to students within the individual QMPlus module site. All examinations will take place in the standard examination periods of January (for Semester 1 modules) and May/June (for Semester 2 modules). All written examinations may use a mixture of short essay and long essay questions.

The final project thesis will be studied across the summer and submitted in September, assessment will include an oral viva, project presentation and the final project. During the project, students will present interim project presentations to an audience of students and staff in preparation for the final viva.

How is the programme structured?

Please specify the structure of the programme diets for all variants of the programme (e.g. full-time, part-time - if applicable). The description should be sufficiently detailed to fully define the structure of the diet.

60 credits of taught modules will be taught in the first semester from September until December and a further 60 credits of taught modules will be taught in the second semester from January until April. Overall 120 credits of taught modules have to be taken. The taught module examinations will take place during the college examination period in January and May/June.

A 60 credit Dental Materials research project will be completed after the examination period in semester 3 (from June - September). Preparation for this research project will begin in the DIN7011 module on Fundamentals of Research Methods taken in the first semester.

Academic Year of Study FT - Year 1

Module Title	Module Code	Credits	Level	Module Selection Status	Academic Year of Study	Semester
Dental Materials 1	DIN7008	15	7	Compulsory	1	Semester 1
Introduction to Oral Biology 1	DIN7156	15	7	Compulsory	1	Semester 1
Fundamentals of Research Methods	DIN7011	15	7	Compulsory	1	Semesters 1 & 2
Minimally Invasive approaches in Clinical Dentistry	DIN7152	15	7	Compulsory	1	Semester 1
Properties of Dental Materials/ Processing Methods II	DIN7009	15	7	Compulsory	1	Semester 2
Biom mineralisation	DIN7154	15	7	Compulsory	1	Semester 2
Dental Hard Tissues	DIN7151	15	7	Compulsory	1	Semester 2
Oral Pathology and Microbiology	DIN7028	15	7	Compulsory	1	Semesters 1 & 2
Level 7 Project Module	DIN7000	60	7	Core	1	Semesters 1-3

What are the entry requirements?

The minimum entry requirement is a 2.2 UK degree or the overseas equivalent in a relevant subject. Degree disciplines such as Medicine, Dentistry, Chemistry, Biology or related subjects in the Sciences will be considered.

If your first language is not English, you must provide evidence of your English language proficiency. Proficiency in written and

spoken English is essential and non-native English speakers are required to have a minimum overall IELTS score of 6.5 with a writing score of 6.0 at the start of the course.

How will the quality of the programme be managed and enhanced? How do we listen to and act on your feedback?

The Staff-Student Liaison Committee provides a formal means of communication and discussion between schools/institutes and its students. The committee consists of student representatives from each year in the school/institute together with appropriate representation from staff within the school/institute. It is designed to respond to the needs of students, as well as act as a forum for discussing programme and module developments. Staff-Student Liaison Committees meet regularly throughout the year. All lectures will have feedback documentation.

Each school/institute operates a Learning and Teaching Committee, or equivalent, which advises the School/Institute Director of Taught Programmes on all matters relating to the delivery of taught programmes at school level including monitoring the application of relevant QM policies and reviewing all proposals for module and programme approval and amendment before submission to Taught Programmes Board. Student views are incorporated in the committee's work in a number of ways, such as through student membership, or consideration of student surveys.

All schools/institutes operate an Annual Programme Review (APR) of their taught undergraduate and postgraduate provision. APR is a continuous process of reflection and action planning which is owned by those responsible for programme delivery who work throughout the year to monitor academic standards and to improve the student experience. Students' views are considered in this process through analysis of the Postgraduate Taught Experience Survey (PTES) and module evaluations.

What academic support is available?

Your wellbeing is very important to us. The Student Support Office (SSO) within the Institute of Dentistry has a well developed team of staff together with your Course and personal tutors to help and guide you through the MSc programme. They are keen to make sure that you are offered confidential, independent and non judgemental advice on matters ranging from personal problems and academic issues to university procedures and financial matters such as student funding.

You will receive a series of Handbooks which will outline the appropriate learning outcomes, academic requirements, and relevant assessment and deadlines for completion of coursework and submission. These are constantly updated and placed on QMPlus for continued reference.

- Personal tutor arrangements: The programme organiser will act as a personal tutor to the students.
- The Iof Student Support Office at the Institute: Head of Student Support and the Senior Tutor
- Programme induction: There will be a formal induction at the start of the programme with the programme organisers and the tutors present, to welcome the students and to introduce the various components of the programme. There will also be a tour of the facilities.

Programme-specific rules and facts

How inclusive is the programme for all students, including those with disabilities?

The Institute of Dentistry will provide the following:

For specific learning disabilities:

- Specialist One to One Study Skills Support
- regular support from a specialist one to one dyslexia tutor
- lecture notes provided prior to the lecture either through QMPlus or via email
- Q-Review for lectures and/or permitting the student to record for lectures outside where Q-Review takes place eg lab sessions on Phantom Heads
- Specialist software with text-to-speech functionality to aid in concentration/fatigue problems

For physical disabilities:

- Speech recognition software allowing students to dictate without manually typing
- Some information regarding the lab/clinic environment and ensuring it is suitably accessible eg ground floor clinics/lift access to labs on higher floors/ramps etc.

The Student Support Office (SSO) has a well developed team who are keen to make sure that you are offered confidential, independent and non-judgemental advice on matters ranging from personal problems and academic issues to university procedures and financial matters such as student funding.

Queen Mary has a central Disability and Dyslexia Service (DDS) that offers support for all students with disabilities, specific learning difficulties and mental health issues. The DDS supports all Queen Mary students: full-time, part-time, undergraduate, postgraduate, UK and international at all campuses and all sites.

Students can access advice, guidance and support in the following areas:

- Finding out if you have a specific learning difficulty like dyslexia
- Applying for funding through the Disabled Students' Allowance (DSA)
- Arranging DSA assessments of need
- Special arrangements in examinations
- Accessing loaned equipment (e.g. digital recorders)
- Specialist one-to-one study skills tuition
- Ensuring access to course materials in alternative formats (e.g. Braille)
- Providing educational support workers (e.g. note-takers, readers, library assistants)
- Access to specialist mentoring support for students with mental health issues and Autistic Spectrum Disorders.

Links with employers, placement opportunities and transferable skills

The improvement of existing dental materials and the development of new materials for use in the dental area is an expanding field in the healthcare sector. There are also opportunities for fundamental research both in universities and industry to help bring innovative technologies to life.

Programme Specification Approval

Person completing Programme Specification:

Mrs Lorraine Low, Quality & Assessments Officer

Person responsible for management of programme:

Dr Saroash Shahid

Date Programme Specification produced / amended by School / Institute Learning and Teaching Committee:

Programme Title: MSc in Dental Materials
