

What is Pharmacology?

Pharmacology:

One of the disciplines of 'biomedical science'
The study of the action, metabolism, side effects and uses of drugs

Pharmacologists involved in:

- Basic lab research
- Bioinformatics
- Drug development
- Safety testing
- Clinical trials
- Regulatory Approval

Study Pharmacology with us at QMUL:

Learn how drugs are discovered and developed, from initial lab research through to clinical use.

1. On campus (*BSc Pharmacology & Innovative Therapeutics*)

- 3 year degree or 4 years with Year in Industry or Study Abroad
- Hands-on lab practical experience
- Timetabled teaching sessions on campus

2. Fully online (*BSc Pharmacology & Drug Discovery*) (from September 2025)

- 3 years full-time or 6 years part-time
- State of the art lab simulations
- Flexible online learning at a time that suits you
